

Model 5: ..HLO points per shock × ..-CI scenario
Median baseline = \$59.7M annual CRS; Model 2 spec 2e .. = 11.14 (95% CI [0.32, 21.95])

Model 5: ..LAYS at expected .., fan over implied-EYS percentiles
LAYS = EYS × (HLO/625); EYS percentiles derived from the LAYS/HLO identity
